

CENTRIFUGAL PUMP WITH VORTEX IMPELLER

APPLICATION

Centrifugal pump with impeller placed in a back recess in the casing cover. Most of the product flows through the pump without reaching the impeller thus allowing it to handle any kind of liquid while avoiding pump clogging. Pumps belonging to this series are fit for liquids containing suspended solid they can be extensively used in the Paper industry, Sugar Industry, Food industry, Waste water conditioning plants etc.

MATERIALS

Standard AISI 316 SS (CF8M) - G25 Cast iron on request: Hastelloy, Monel, Durimet, Carpenter, and other alloys on demand.

CENTRIFUGAL PUMP WITH CHANNELS IMPELLER

APPLICATION

Centrifugal pump with channel impeller. Pumps belonging to this series are fit for liquids containing suspended solid matter, hence they can be extensively used in the Paper industry, Sugar industry, Food industry, Waste water conditioning plants etc.

MATERIALS

Standard AISI 316 SS (CF8M) - G25 Cast iron on request: Hastelloy, Monel, Durimet, Carpenter, and other alloys on demand.
